DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 18-24 and 26-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 18 and 35 recite the first and second laser modules are disposed in the handpiece.

Contrary to this claimed limitation, paragraph [0013] of the instant application states that the handpiece is preferably "connected in a releasable manner to a rear part which in turn communicates with a base unit via a common line," and the laser modules, the associated power circuitry and control modules are housed together in this base unit. Furthermore, Figure 1 shows the laser modules 2,3, are housed in the base unit 1; and Figure 2 shows the handpiece is optically connected to the base unit, but does not house the laser modules.

Appropriate correction is required.
